Manual Mode

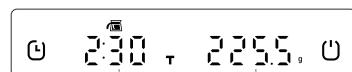

Turn ON the coffee scale. Put coffee tools on the coffee scale platform. Press to tare the weight after filter paper is moisturized.

Add coffee powder to your desired weight, take note of the weight at the same time.

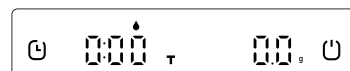

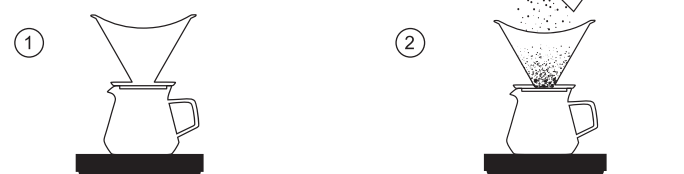

Press again, the weight is zero out and ready for brewing. Press to start timer while pouring in water. Timer helps to monitor the brewing process.

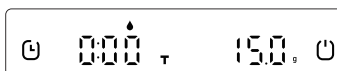

When brewing is finished, the display shows the weight of coffee and brewing time.

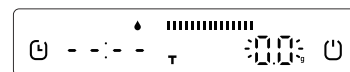

Hand Drip Mode Auto Timer + Ratio

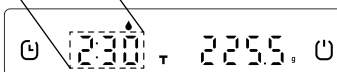

Turn ON the coffee scale. Put coffee tools on the coffee scale platform. Press To tare the weight after filter paper is moisturized.

Add coffee powder to your desired weight, take note of the weight at the same time.

Press the button, the scale records the weight of coffee powder, and the mode of Auto Timer + Ratio is activated (Timer area shows ---, weight area shows a flashing 0.0g). Now it is ready to brew. When pouring in water, weight is measured and timer starts automatically. The bar indicates the speed of water being poured in.

In the brewing process, press to change between timer and ratio. When brewing is finished, remove coffee tools. The data is shown on the display.

Warning

- The scale is not waterproof. Do not wash it. Keep the charging port dry.
- The weighing capacity is 2000g. Do not weigh with objects over the range.
- To maintain the battery lifespan, use a charging block with an output of 5 volts and 1 amp. Do not use the scale when plugged in.
- The scale must be used on a flat level.
- The scale carries precise components. Stay away from any vigorous collision.
